

Brainstorming Meeting with CSC Student Committee

What does a safer campus look like to you?

- Inclusive of all student voices and initiatives
- Transparency of activities and decisions
- Inclusive process of decision making
- Raised awareness of safety campaigns on campus
- A place where students/staff can be themselves and have their unique parts of their identity known and be proud of it, without fear of discrimination
- A safer community is one where there is a sense of community where all members feel respected with their views
- More welcoming environment
- To provide a safe campus by promoting safety initiatives through various forms and mediums
- I would like to see York students more involved in community safety initiatives, seminars, workshops, and if not, participate in events at least, be aware they exist and know things that are going on at the campus
- A campus where all members of the community can fully participate and be respected and not have fear of discrimination, harassment or violence
- Consistent promotion of safety on campus
- A space for students to feel comfortable bringing up safety issues
